

MannMitra — 3-Minute Pitch

Spoken script (Gujju-English) · ~400 words · PromptWars

0:00 – 0:30 HOOK + PROBLEM

"Namaste judges. Dar varse lakho students NEET, JEE, UPSC, board exams ni taiyari kare chhe. Aapde badha emna *marks* joiye chhiye, but emnu **mental health** koi nathi joto. Stress, burnout, self-doubt, ane e badhu chup-chaap. Normal mood-tracker fakt puchhe 'rate your day 1 to 5', but e *kem* stress chhe e samajta nathi. Ane jyare 2 vagye panic thaay, tyare vaat karva koi hotu nathi."

0:30 – 1:30 SOLUTION

"Etle aapde banavyu **MannMitra**, ek GenAI man-no-mitra. E 3 vastu kare chhe.

Ek, lines ni vachche vanchi le chhe. Student freely lakhe, ane AI chhupaela stress triggers shodhe, jaise 'tu tari value mock test na marks saathe jodi rahyo chhe.'

Be, turt pyaar thi reply aape chhe, personalized coping tips, mood pramane mindfulness exercise, ane hamesha available chat.

Tran, journey ni note rakhe chhe, wellness graph thi time saathe improvement dekhaay."

1:30 – 2:20 WHY WE WIN

(Slow down here, this is your winning point.)

"Pan aamaru sauthi strong point chhe **safety**. Jo koi student self-harm ni vaat kare, to e detect karvanu kaam **AI nahi, sidha code** kare chhe, etle ke **Python regex** thi, ane turt India ni verified helpline, Tele-MANAS 14416, batave. AI hallucinate kare ke miss kare, but regex 100% reliable chhe. Aapde student na jeev no jugaar AI par nathi chhodta.

Beju, e **kyarey fail nathi thatu**. AI ke internet band hoy to pan offline engine sachu reflection aape. Demo kyarey bagde nahi.

Ane badhu **secure** chhe, API key server par, database protected, 35 automated tests."

2:20 – 3:00 PROOF + CLOSE

"Aa fakt idea nathi, e **live deploy** chhe Vercel par, AI ane Supabase saathe, fully working. Ane last vaat, MannMitra therapist ni jagya nathi leto. E evo saathi chhe je student na sauthi aghra varse ma eni saathe bese chhe, ane khatri kare chhe ke jo kyarey danger hoy, to madad fakt ek tap dur chhe.

(Pause here.) **Ek app ane ek lifeline vachche, aaj farak chhe. Thank you!"**

If a judge asks: "Safety detection kevi rite kare chho?"

Answer: "Crisis detection ma **koi AI ke ML library nathi vaapri**. E Python ni built-in `re` (regex) module thi thaay chhe. Aapde self-harm na known phrases ni list ne ek regex pattern ma compile kari, ane daru message ne scan kariye. **AI nahi, code decide kare chhe**. Kem? Karan ke LLM hallucinate kare ke miss kare, but regex match 100% reliable, instant, free, ane offline pan

chaale. Student ni safety jevi serious vastu model na bharose na chhodaay. Etle **safety = code (regex), empathy = AI.**"

Speaking tips

- **Slow down** at the safety part (1:30–2:20), let it land.
- **Pause** before the last line for impact.
- Keep your **live URL open** on screen, show one check-in if asked.
- Short on time? Drop the "journey/history" line, still complete.
